**QUALITY ASSURANCE**  
**TIMELY DELIVERY**  
**CUSTOMER-CENTRIC APPROACH**

### VACUUM DEWATERING SYSTEM

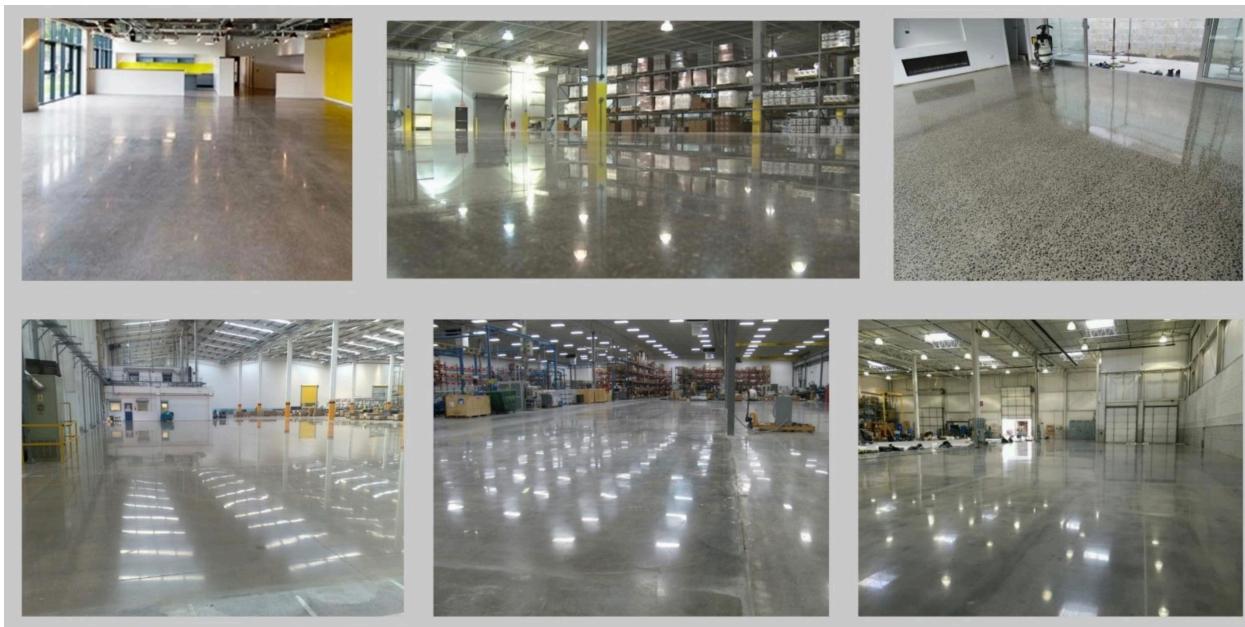

### BRUSH / LINE FINISHING FLOORING

## **GLOSSY FINISHING CONCRETE FLOOR & DENSIFICATION**

Polished concrete floors provide a smooth, mirror-like surface finish. The design choices for polished concrete are limitless. You can select practically any specific color, design variations, or simply add aggregates or even unique objects into the concrete floor just before polishing. The light reflection on the surface area can be controlled by applying different levels of a concrete floor polishing. Our polished concrete flooring is the most suitable solution for a contemporary up-to-date overall loc 3/8 which is perfect for an all-natural polished concrete appearance. Areas that polished concrete floor can be used include: retail outlets, art galleries, residential homes and commercial buildings. Polished concrete floors are in demand simply because they are very easy to maintain. Polished concrete floors require periodic maintenance like other flooring solutions, but the techniques used to clean these floors are the cheapest methods possible. Moreover, these floors last longer.

<b>Application:-</b>	<b>Advantages:-</b>
large storage warehouses Industrial floorings privately owned residences office buildings Retail outlets Motor vehicle showrooms Restaurants and hotels	Strengthening of floor surface Improve reflectivity by 30% Improve condition of old floor Minimal Maintenance Durable Cost Effective Dust proof Eliminates high maintenance cost

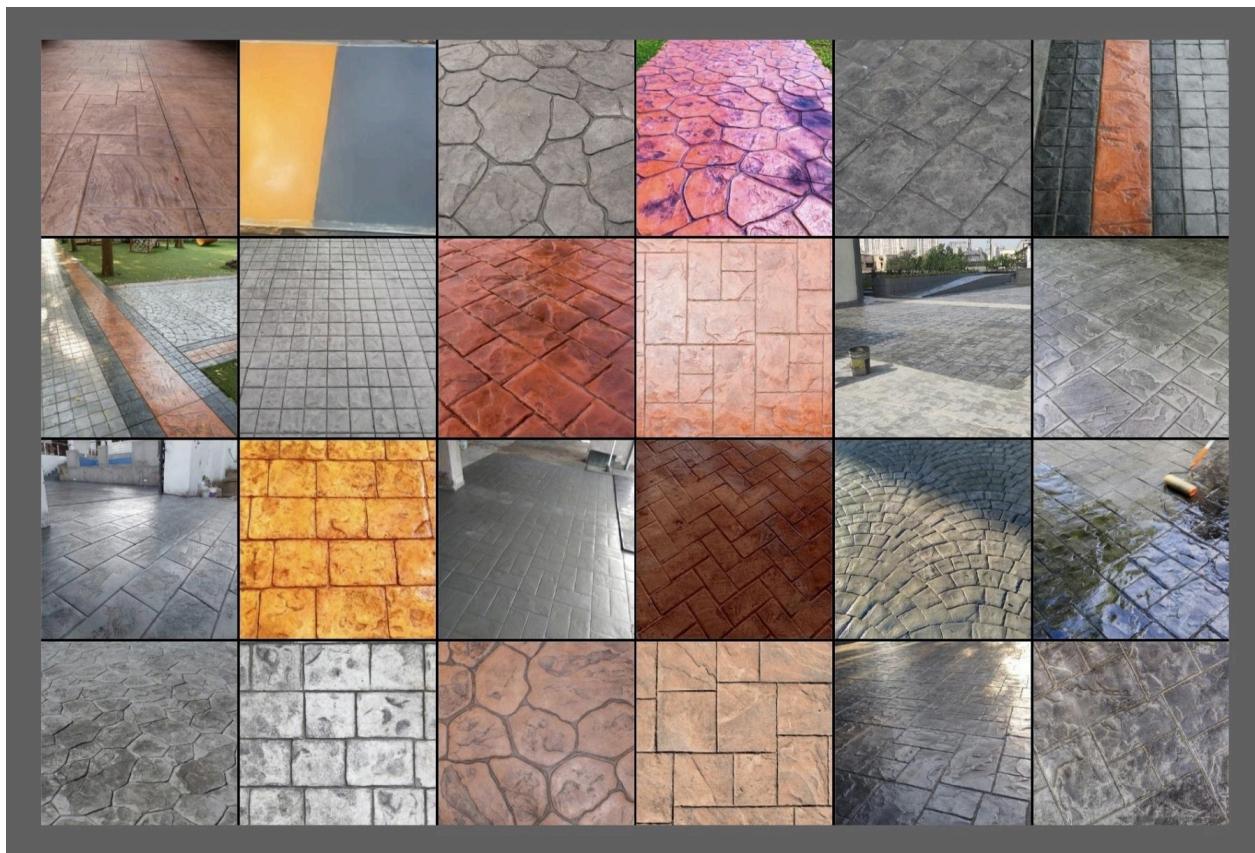

## STAMPED CONCRETE FLOORING

Stamp Concrete System is cast-in-place concrete, integrally colored and stamped with texturing tools to produce a surface similar to natural stone, brick, slate and other paving materials.

Stampcrete Color Hardener is specially formulated to be easily incorporated into the durable, abrasion-resistant surfaces, which offer streak-free vibrant colors, providing an attractive and long-lasting finish for any type of traffic. Stampcrete hardeners are longer wearing, easier to maintain, and more resistant to the effects of freeze/thaw cycles and salts. Textured surfaces may be implemented with this system to give authentic appearance variations wherever applicable.

Application:-	Advantages:-
Drive ways Parking lots Foot path Swimming pool deck Garden Commercial building interior or exterior	Abrasion resistance Non skid Choice of colors Choice of design Durable than Tiles and paver blocks Low maintenance required

## VACUUM DEWATERING FLOORING

We are leading service providers for Vacuum dewatered flooring (VDF) & IPS Flooring. Various Floors in factories, warehouses and industries has extensive application of concrete which is a versatile flooring and has been in use for a long time. To mitigate the normal issues you face with concrete, a system was devised to improve the properties of concrete floors. This system is called Vacuum Dewatered Floors (VDF) The Vacuum Dewatered (VD) Flooring method, is a system for laying high quality concrete floors with superior cost-effectiveness. The key to the use of this method is the dewatering of concrete by vacuum process. Surplus water from the concrete is removed immediately after placing and vibration, reducing the water-cement ratio to an optimum level.

<b>Application:-</b>	<b>Advantages:-</b>
large storage warehouses Industrial floorings privately owned residences office buildings exterior road Retail outlets Parking lot area Godowns	Strengthening of floor surface Anti skid Minimal Maintenance Durable Cost Effective Eliminates high maintenance cost Less wear and tear of floor surface Increase compression and tensile strength

## SOME OF OUR CLIENTS

S.NO	COMPANY NAME	ADDRESS	AREA Sq.ft
01	Devansh enterprises (Radha residency chs.ltd.)	Borivali	80,000
02	Kamala mills (under shree samartha solsys)	Lower parel	75,000
03	Sterling and Wilson (A3M contracts pvt.ltd)	Airoli	25,000
